Tank truck driver (m/f/d) | C/CE | ADR hazardous goods for our HUB in Bochum-Wattenscheid

Beschreibung

Since our founding in 1965, we have developed into an internationally active freight forwarding company specializing in the transport of basic chemicals. In particular, the transport of liquid sulfur has become our hallmark over many years. We also transport sulfuric acid, oleum, caustic potash solution, and solvents. Since June 1, 2017, we have been part of Mitsui & Co., Ltd., a major Japanese trading group with a global presence and around 47,000 employees worldwide.

Our company focuses on safety and quality. We place great importance on using modern equipment and meeting all technical safety standards. Our long-established quality assurance system (DIN EN ISO 9001), as well as the requirements of SQAS (Safety and Quality Assessment for Sustainability), serve as our benchmark. In this way, we ensure the safety of all our employees and the reliability of our transport operations.

Zuständigkeiten / Hauptaufgaben

- Independent loading and unloading of our vehicles
- Taking over routes for all types of transport (national and international)
- Documentation of your entire route progress
- Departure checks on the vehicles assigned to you
- Complete documentation of the transport papers
